FALL 2021 WELCOME TO SLC+

SLC+ at St. Lawrence College is the place to follow through on your goals, whether it be for professional development, a new interest, or to pursue a lifelong passion. From courses in painting, creative writing, business, languages, and more, SLC+ offers courses to suit a variety of needs and interests – in a vibrant, virtual format or safely in-person, when possible.

As a proud lifelong learner myself, I'm thrilled to share this guide with you. Courses and programs from Ontario colleges help people grow, be invigorated, and start new paths. We look forward to helping you start a new journey, continue working towards an educational goal, or just explore all that is available.

Glenn Vollebregt
President and CEO
St. Lawrence College
 @gvollebregt
stlawrencecollege.ca

WHAT IS SLC+

Since 1967, St. Lawrence College has been opening doors for tomorrow's leaders in Eastern Ontario with over 100,000 graduates across more than 100 full-time programs.

But did you know that St. Lawrence College offers MORE? More opportunity to grow. More opportunity to explore. More opportunity to learn.

Introducing SLC+; a collection of learning opportunities that extend beyond traditional academic programming.

SLC+ is micro-credentials, short competency-based training to help gain employability skills in a condensed timeframe.

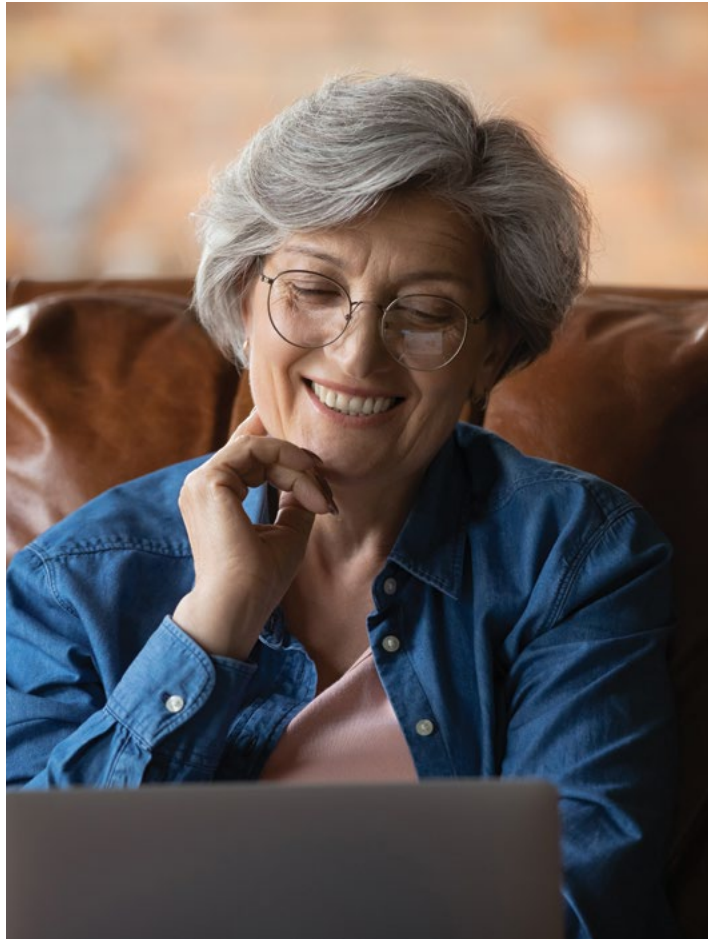

SLC+ is personal growth and general interest courses and programs, available for those who want to explore new passions and interests.

SLC+ is part-time courses, certificates, and diploma programs, designed to accommodate busy schedules.

SLC+ is corporate training, customized training programs built to respond to the needs of local organizations.

Whether your goal is to upskill or reskill, to pursue a new interest, or to drive business innovation, choose SLC+ to continue your educational journey.

SLC+ | More Opportunity

CREDIT COURSES

The College-wide grading system described in the Academic Policy is applied to all credit courses. Students may take courses for credit, for personal reasons, or for skills updating, even if they do not need the college credit.

Courses requiring a textbook are identified in the guide using the symbol .

NON-CREDIT COURSES

These courses do not provide a college credit but in some cases students may earn a certification or other evidence of class completions to meet personal or professional requirements.

COMING TO CAMPUS & COVID-19

Health and safety guidelines and COVID-19 vaccine information for individuals coming to campus is available on our website at stlawrencecollege.ca/covid19.

FLEXIBLE LEARNING

Online

Online courses actively engage learners with the course resources and experiences using a variety of interactive media including, but not limited to, videos, interactive storylines, simulations, and virtual reality. There are no classes to attend in-person. Most online courses include assessments which must be completed to earn the course credit or micro-credential. All online courses have a facilitator who will provide support and guidance for the course.

In-Person

These courses are instructor-led and take place in-person on our campuses or a designated off-site location. They are typically offered on weeknights or weekends. Some courses may be available during the day.

Alternate Delivery

These courses are instructor-led and use web resources and technology to facilitate learning in a virtual face-to-face environment using Teams or Zoom.

MICRO-CREDENTIALS

Micro-credentials are short, competency-based training opportunities that focus on in-demand workplace skills. They include real-world learning experiences and assessments and are developed in consultation with industry experts to ensure they reflect the skills employers are looking for.

They can be taken individually or stacked to build larger certificates, and multiple micro-credentials may serve as pathways to other SLC programs. Each micro-credential earned comes with a digital badge that can be shared with employers and added to a digital profile or portfolio.

Visit stlawrencecollege.ca/micro-credentials to learn more about the micro-credentials we are offering this term.

Cybersecurity - Personal

Develop the knowledge and skills to prevent, identify, mitigate risk, and report online scams and fraud.

Distribution: Systems/End-to-End

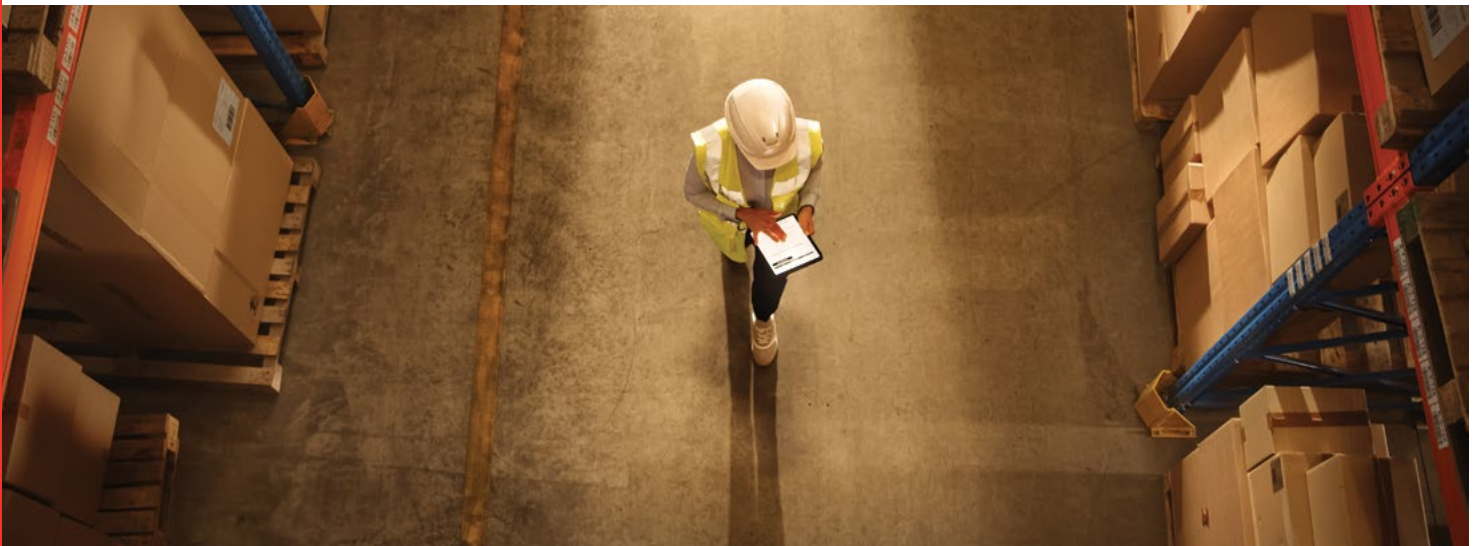

A distribution system consists of all elements involved in the placement, storage, and transportation of goods so that they are available for consumers. Learners will focus on building relationship management skills to develop metrics for raw materials, dealers/distributors, and end-users. Learners will identify efficient processes such as good design, optimal flow, and safety measures in the transportation of goods as well as balancing service and cost. Learners will have opportunities to apply the skills they have learned throughout the course.

Distribution: Transportation Service & Systems

Transportation is an important factor to consider at multiple points in the logistics process, and it often represents the highest cost in a business's overall logistics spending. Learners will explore the ways/benefits of transporting freight for the organization as well as the consumer, and look at route optimization, load distribution, shipment tracking, and generating shipment reports. Learners will discover the secrets of effective fleet control and in the final assessment, apply the skills they have learned throughout the course.

Logistics: Fleet Optimization

Learners will design optimal routes and fuel plans as well as maintain up-to-date delivery information. They will discover what skills are needed to facilitate timely vehicle maintenance and inspection, calculate load arrival times, and integrate hours of service information. Learners will use these skills to apply weight and load securement factors in fleet planning and operations and assess the mode of transportation impact to plan for delivery to the Distribution Centre and last mile to store.

Logistics: Fulfillment

Learners acquire skills in implementing the use of metrics (incl. supplier rates of production, materials used, progress of work, lead time and fill time) to support fulfillment targets. Assessing compliance with Federal, Provincial and International regulations is embedded within fulfillment operations. Learners are required to schedule pick-up and delivery, complete invoicing processes, and connect fulfillment processes to efficiency and cost containment.

Logistics: Inventory Optimization

Do you want to improve your workflow? Learners will discover the goals of inventory management optimization and will look at some real-world examples. This course can help you understand how to analyze metrics, subcontractors, and fleet organizations to make sure the workflow process is efficient. You'll also learn to look at data, to see areas for growth within the organization.

Tourism & Hospitality Fundamentals

Gain an overview of the Tourism and Hospitality Industry and how the different components fit together to create value for an organization. The modules provide practical experience in some of the most common areas of tourism and hospitality from both an operational and tactical perspective.

COMING SOON

Electrical

Explore power, voltage, resistance, current and how to troubleshoot issues that arise. In this micro-credential you will perform basic measurements and use the correct equipment for the job. Learn about the equipment, safety requirements, and applications of alternating current (AC) and direct current (DC) systems. Examine AC and DC motor drives, control systems and procedures to help you troubleshoot issues in circuits and equipment. Investigate fuses, circuit breakers, instrument transformers, relays, and associated equipment, and how they work within electrical systems.

Entrepreneurship

Learners brainstorm and develop a business idea. Using established industry processes, learners evaluate the strengths, weaknesses, threats, and opportunities of the business idea and how to position the business for success. Customer needs and relationships, industry partnerships, resources, and value propositions are integrated into this strategic analysis.

Quality Assurance & Compliance

Learn what to look for in an inspection, how to conduct an inspection, and how to initiate a corrective action process. This course will help you understand how standards impact the quality assurance process in the manufacturing industry. You will become more familiar with standard operating procedures (SOPs) and good manufacturing processes (GMPs).

Steel & Aluminum Processing

You will learn about personal protective equipment and safety protocols in the shop. Discover the parts and accessories of the milling machine. Explore feed rates and cutting speeds, and learn how to use the milling machine. Examine the parts and accessories associated with a lathe. You'll look at a heat treat oven and learn to harden, quench, and temper metals. Observe the process of heating carbon steels, how to test metals, and the tensile and hardness testing process. This course will also show you the different types of welds, the purpose of each type of weld, and the metals used in each type of weld.

CERTIFICATES

Certificates are short-term programs that will help you develop your career competency in a single subject area. Some Online certificate courses have in-class course equivalents. To view these equivalents, find the certificate at stlawrencecollege.ca/programs, and review the course offerings. You may have already completed some of these courses or you may prefer to take them in-class (subject to availability). If you have any questions about what will work for you, contact lifelonglearning@sl.on.ca and one of our SLC+ representatives will work with you to create your pathway to success.

Accounting

The Accounting Certificate is designed for individuals who wish to acquire a thorough accounting education. Many students have also found these studies to be of value in career advancement. Several of the courses may be of interest to those who would like to expand their accounting experience.

Bookkeeping

St. Lawrence College, in cooperation with the Canadian Institute of Bookkeeping (CIB), offers a certificate leading to a career as a professional bookkeeper. CIB is a national, non-profit organization dedicated to preparing you for greater financial and job security as a Certified Bookkeeper.

Business Management/ Entrepreneurial

This certificate has been designed to meet the needs of students seeking a broad knowledge of business administration and specializing in the area of Entrepreneurial studies.

Criminal Psychology & Behaviour

The psychology behind why individuals become criminals and why people are attracted to those with deviant behaviours will be studied. This program will appeal to individuals who are working or volunteering in a corrections program, working or volunteering at a women's shelter, working with youth at risk, or individuals who have a special interest in criminal psychology and behaviour.

eLearning Developer

With the growth of online education, teaching and training has advanced the need for skilled developers of web-based learning.

This program is designed to provide students with usable skills and a pedagogical basis in order to develop quality online learning materials.

Fibre Arts – Traditional Rug Hooking

This program introduces those with a passion for rug hooking to the many aspects of the art, in a current version of this pioneer craft. Combining a balance of theory, studio, and application of skills, the Traditional Rug Hooking Certificate gives credibility to the artist for personal and professional development.

Fine Arts

In this introductory program, students develop basic skills in drawing, painting, and colour in a variety of media. Students are encouraged to explore their individual creativity and artistic ability. Students experience both the practical and theoretical components of fine arts.

French Language Certificate

This program is designed for students who have little or no knowledge of French to reach a level of oral expression and comprehension that enables them to converse in everyday and professional situations. Emphasis is placed on interpersonal communication. Grammar and vocabulary progress from simple sentences and words to being more complex and varied. Reading and writing are part of the program as these are fundamental language skills. Students learn through a variety of engaging and interactive activities that build confidence in communicating in French.

French Language Certificate (Advanced)

The advanced level program focuses on oral communication and expression with reading assignments outside the classroom. These courses are ideal for those wishing to keep up their fluency in French or for those moving beyond the first level certificate. Learn to express yourself proficiently in a relaxed environment under the guidance of an expert instructor.

Fundraising Management

Students learn the techniques and skills required by not-for-profit managers, employees, and volunteers to implement a wide variety of fundraising strategies and campaigns. The core courses provide training related to all aspects of successful fundraising, including recognizing opportunities, managing events, communicating with volunteers, donors and the media, as well as marketing and financial planning.

Geographic Information Systems

Geographic Information Systems (GIS) provides the ability to automate map production and to integrate Earth imagery with other data to solve geographic problems.

Geological Studies

In this program, students complete a number of online courses all relating to the science of Geology. There is a suggested order of courses. Students begin with an overview of the study of the Earth, examining the Earth's origins, properties, dimensions and location, volcanoes, earthquakes, landslides, rocks and minerals, fossils, and history.

Health Records Clerk

Designed to provide the theoretical education needed to obtain employment as a Health Records Clerk, students are expected to have the equivalent of an introductory computer course.

Home Inspection

This program provides an opportunity to enter an exciting and growing profession. Home inspection is a consulting service that helps home buyers make informed decisions about their prospective new home.

Hospital Ward Clerk

Designed to provide the theoretical training necessary to obtain employment as a Hospital Ward Clerk/Secretary, students are expected to have the equivalent of an introductory computer course.

Human Resources

This certificate provides basic skills in the major areas of personnel administration, human resources planning, job analysis, interviewing, compensation and benefits, personnel testing, performance appraisal, industrial relations, and collective bargaining.

Instructional Design

The Instructional Design program is for students interested in the theory, practice, and design of instructional content for many modes of delivery.

Leadership Development Series

The program builds on existing skills and experience and applies those skills to workplace situations. Content includes communications,

ethics, performance management, change management, team building, planning, and project management.

Legal Office Assistant

This program is offered entirely online and is designed primarily for the person with little or no previous business experience. The focus is on the development of strong office support skills with emphasis on interpersonal, organizational, and communication skills.

Literary Writing

The Literary Writing Certificate is for anyone who wants to explore his or her potential as a writer in a practical, constructive, and goal-oriented academic environment.

Medical Transcriptionist

Graduates of this program will have obtained the knowledge and skills required to compete for entry-level positions in hospitals, medical clinics, physician's offices, and online transcription companies.

Office Assistant

This core program will prepare you with fundamental computer and service skills for any office environment. As a graduate of this certificate, you will be equipped with the skills needed for entry into office clerical support positions in a variety of business sectors.

Records & Information Management

All types of businesses and organizations have a need for records and information management. For example, all three levels of government – municipal, provincial and

federal – need the services of an information specialist, as do insurance companies, banks, retail organizations, manufacturing companies, and law firms. Career opportunities are most prevalent in medium to large companies.

Sustainable Local Food

This certificate explores the practices, principles, and philosophies involved in local food system development. The focus is on increasing both academic and hands-on knowledge of regional food initiatives across Canada, alongside international best practices. There is a specific concentration on applied learning, online networking, and community research. This certificate is the first of its kind in Canada, providing a cutting edge advantage when competing for work in the sustainable local food sector.

Train the Trainer

Adult learners bring a variety of life experiences, needs and abilities to their learning situations. Educators must respond with strategies and methods that facilitate learning and assist students in achieving their goals. The courses leading to this certificate provide the educator with a variety of strategies and methods to respond to these needs.

Website Creation & Design

The Internet and the World Wide Web have revolutionized the way people communicate and the way organizations do business. As a result, there is a rapidly growing demand for computer professionals who know how to establish and maintain a website.

DIPLOMAS

(ONLINE PART-TIME)

Online learning offers the flexibility of studying part-time while continuing to balance personal and professional priorities. Course resources are accessible 24/7, making it ideal for those who are unable to attend regularly scheduled classes. The online programs and courses offer the same learning outcomes and credentials as in-class.

Early Childhood Education Diploma

Graduates have a firm understanding of human development from birth to 12 years of age, and can use this understanding to create responsive, inclusive, play-based learning environments to best support the child as they develop. Students receive 630 hours of practical experience in a variety of early learning environments during three field placements starting in the second semester of the program.

Admission Requirements

- Ontario Secondary School Diploma (OSSD) with the majority of Grade 11 and 12 courses at the C, U, or M level including the following prerequisites:
- Grade 12 English at the C or U level
- Grade 11 Math

Apply online at www.ontariocolleges.ca.

lifelonglearning@sl.on.ca

IMPORTANT DATES

No Classes: Thanksgiving Day

ST. LAWRENCE COLLEGE

Kingston: 100 Portsmouth Avenue K7L 5A6

Brockville: 2288 Parkedale Avenue K6V 5X3

Cornwall: 2 St. Lawrence Drive K6H 4Z1

REFUND/WITHDRAWAL POLICIES

Continuing Education Credit, Micro-credentials, and Non-Credit Courses

A full refund will be issued if the course is cancelled by the College. A refund less a \$25 administrative fee per course will be issued if the withdrawal request is received in writing/email five business days prior to the start date of the course. Withdrawal requests must be emailed to lifelonglearning@sl.on.ca. Non-attendance does not constitute withdrawal from a course.

Online Part-Time Diplomas

For Early Childhood Education and Police Foundations, a full refund will be issued if the course is cancelled by the College. A refund less an administrative fee will be issued if the withdrawal request is received in writing/email ten business days after the semester/course start date.

Full-Time Students: \$250 **Part-Time Students:** \$25 per course.

Email withdrawal requests to deregistration@sl.on.ca.

OntarioLearn Courses

A full refund will be issued if the course is cancelled by the College. A refund less a \$25 administrative fee per course will be issued if the withdrawal request is received in writing/email by the withdrawal date listed in the OntarioLearn access email or ten business days after course start date. There are no refunds on material fees. Email withdrawal requests to ontariolearn@sl.on.ca. OntarioLearn courses are identified by the course codes beginning with CS (i.e. CSSL25).

COURSE CANCELLATION

Every effort will be made to offer courses as listed this semester. All courses are subject to cancellation by the College. To help avoid cancellation due to insufficient enrollment, register at least one week before the course start date.

BOOKSTORE & TEXTBOOKS

Book lists can be viewed through your slc.me account. Books may be purchased online and shipped directly to you. To view each campus bookstore online, go to:

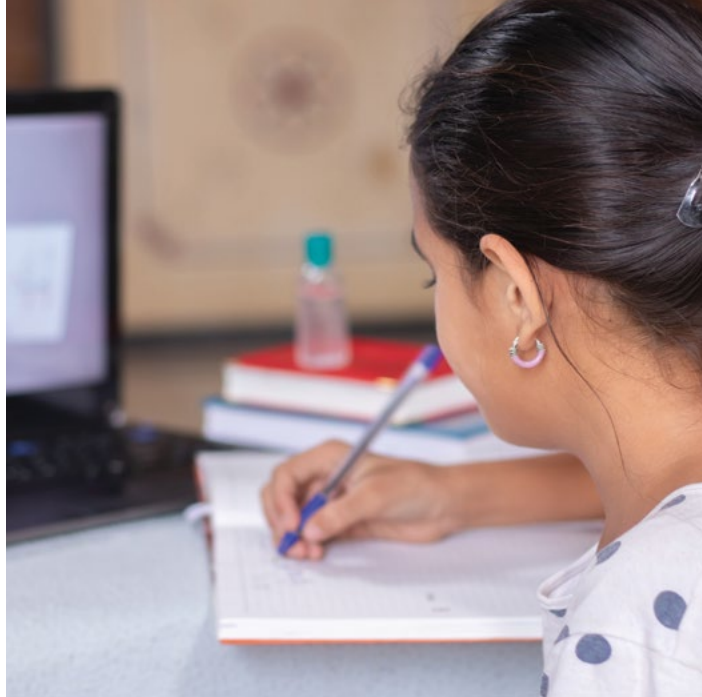

Brockville: stlbrockvilleshop.ca

Cornwall: stlcornwallshop.ca

Kingston: stlkingstonshop.ca

DISCLAIMER
